Data source and methods

Incidence

Country-specific data source: Cancer Registry of North Tunisia, Cancer Registry of Central Region

Method: Weighted/simple average of the most recent local rates applied to 2018 population

Mortality

Country-specific data source: National (WHO)

Method: Estimated from national incidence estimates by modelling, using incidence:mortality ratios derived from cancer registry data in neighbouring countries

Prevalence

Computed using sex-, site- and age-specific incidence to 1-;3- and 5-year prevalence ratios from Nordic countries for the period (2000-2009), and scaled using Human Development Index (HDI) ratios.
